

ALVIN NAUVAL AULIA

Electronic Engineering

☎ 081246096941 ✉ alvinnauvalaulia@gmail.com 🌐 Pati, Central Java

ABOUT ME

Electrical Engineering graduate specializing in industrial automation, embedded systems, and IoT solutions. Skilled in PLC & HMI programming, control system design, and sensor-actuator integration, with hands-on experience in industry-oriented projects. Highly motivated to contribute to the development of smart technologies and Industry 4.0 innovations.

EDUCATION

2023- 2026

Semarang State
Polytechnic

Electronics Engineering Department

- Studied electronic circuits, microcontrollers, PLC programming, and IoT systems
- Designed and developed basic IoT-based monitoring and control systems
- Performed installation, testing, troubleshooting, and maintenance of electronic and automation equipment
- Built and integrated circuits, sensors, and controllers for real-world applications
- Developed skills in system diagnostics, embedded programming, and industrial automation

2020 - 2023

Tunas Harapan Pati
Vocational School

Industrial Automation Engineering Department

- Studied industrial automation systems, PLC programming, and electrical control systems
- Performed installation, testing, and troubleshooting of automation equipment
- Worked on hands-on projects involving circuit design and system integration
- Developed technical skills in maintenance, problem-solving, and system diagnostics

EXPERIENCE

September - December 2025

CV Sarana Cipta Media
Semarang

Quality Control

- Conducted testing and quality inspection of electronic training modules.
- Ensured circuit, wiring, and component functionality met specifications.
- Identified issues and performed troubleshooting to maintain product quality.

September - December 2022

PT. Yogya Presisi
Tehnikatama industry

Electrical Maintenance

- Performed preventive maintenance on electrical equipment and control systems.
- Conducted troubleshooting and repairs to maintain system performance.
- Ensured equipment operated in accordance with safety standards.

June - August 2022

PT. Laju Perdana
Indah

Electronics Service Division

- Focused on maintenance and repair of three-phase motors and industrial systems
- Performed troubleshooting, diagnostics, and component replacement
- Ensured optimal performance of factory equipment and electrical systems

SKILLS

- | | | |
|---------------------------------------|-----------------------------|-----------------------------|
| • PLC Programming | • Sensor Integration | • Circuit Design & Analysis |
| • Electrical Control Systems & Wiring | • IoT Development | • Problem Solving |
| • Industrial Automation Systems | • Pneumatic Control Systems | • Teamwork & Collaboration |

CERTIFICATE

- Wecon Automation Technical - 2023
- Industrial Automation Technician (BNSP) - 2025
